

**2018-2019 BOARD OF EDUCATION APPROVED INDUSTRY CERTIFICATIONS, OCCUPATIONAL COMPETENCY ASSESSMENTS, AND PROFESSIONAL LICENSES**

**BOARD APPROVED / APRIL 26, 2018**

One student-selected verified credit may be awarded for passing one certification or licensure examination when the student earns one standard unit of credit in a career and technical education concentration.

Two student-selected verified credits may be awarded for students who complete a career and technical education concentration and pass two certifications or licensure examinations. In accordance with [8VAC20-131-50. B.](#), requirements for the Standard Diploma (effective for students entering ninth grade prior to the 2018-2019 school year), the career and technical education industry certification verified credit requirement must first be substituted for the student-selected test<sup>5</sup>. The second industry certification may be substituted for either a laboratory science or history and social sciences verified credit. Any one certification or licensure examination identified in this document will satisfy the Standard Diploma graduation requirement for the career and technical education credential<sup>8</sup>. [8VAC20-131-50. C.](#) Students pursuing the Advanced Studies Diploma<sup>6</sup> may utilize additional tests for earning verified credit in computer science, technology, career or technical education, economics or other areas as prescribed by the board in [8VAC20-131-110](#).

In accordance with [8VAC20-131-51. B.](#), requirements for the Standard Diploma (effective with the students who enter the ninth grade in the 2018-2019 school year and beyond), students who complete a career and technical education program sequence and pass more than one industry certification may substitute it for either a laboratory science or history and social science verified credit when the certification, license, or credential confers more than one verified credit. The examination or occupational competency assessment must be approved by the board as an additional test to verify student achievement.

Additional Requirements for Graduation – [8VAC20-131-51. B](#) and C (Standard and Advanced Studies Diplomas)

In accordance with the Standards of Quality, students shall either (i) complete an Advanced Placement, honors, or International Baccalaureate course, or (ii) earn a career and technical education credential approved by the board, except when a career and technical education credential in a particular subject area is not readily available or appropriate or does not adequately measure student competency, in which case the student shall receive satisfactory competency-based instruction in the subject area to satisfy the standard diploma requirements or the advanced studies diploma requirements. The career and technical education credential, when required, could include the successful completion of an industry certification, state licensure examination, a national occupational competency assessment, or the Virginia workplace readiness assessment.

- Students are eligible to earn diploma seals by passing one of the credentials or licensure examinations in this document as well as completing the requirements set forth in [8VAC20-131-50. H. 3, 4](#) and [8VAC20-131-51. H. 3,4](#).

(For each of the tables below, items with an asterisk (\*) and green highlighted background indicate new credentials.)
