

July 1, 2019

MEMORANDUM

TO: District Health Directors
Environmental Health Managers
Office of Environmental Health Services Staff
Onsite Soil Evaluators
Professional Engineers
Onsite System Operators and Installers
Water Well System Providers

GMP #2019-01

THROUGH: M. Norman Oliver, MD, MA
State Health Commissioner

THROUGH: Allen Knapp, Director
Office of Environmental Health Services

FROM: Lance Gregory, Director
Division of Onsite Sewage and Water Services, Environmental Engineering,
and Marina Programs

SUBJECT: GUIDANCE MEMORANDA AND POLICY (GMP) 2019-01
Section 32.1-248.4 of the Code of Virginia; Hardship Guidelines

PURPOSE: This policy outlines the procedure for means testing of owners who petition the Virginia Department of Health (VDH) for onsite sewage and private well evaluation and design services pursuant to [§ 32.1-248.4 of the Code of Virginia](#) (the Code). This policy also establishes Hardship Guidelines whereby VDH may serve as a provider of last resort for onsite sewage and private well evaluation and design services pursuant to § 32.1-248.4 of the Code.

SCOPE:

This policy outlines the procedure for means testing of owners who petition VDH for evaluation and design services for onsite sewage systems and private well pursuant to § 32.1-248.4 of the Code ([HB 888](#)). This policy also establishes Hardship Guidelines necessary to implement the

transition of evaluation and design services for onsite sewage systems and private wells to the private sector, while maintaining VDH as a provider of last resort as outlined in § 32.1-248.4 of the Code. Owners requesting evaluation and design services who fail to meet the income eligibility criteria established in the Code or the Hardship Guidelines are required to obtain evaluation and design services from the private sector.

AUTHORITY:

Section 32.1-248.4 of the Code, as amended and effective July 1, 2018, provides authority for VDH to gradually transition evaluation and design services for onsite sewage systems and private wells to the private sector. The Code authorizes VDH to continue providing evaluation and design services associated with a building permit for a principal place of residence or the repair of a system serving a principal place of residence from July 1, 2019, to June 30, 2023 for owners that meet income eligibility criteria specified in § 32.1-248.4 of the Code. The Code also authorizes VDH to establish guidelines to maintain VDH as a provider of last resort for owners who demonstrate a specific hardship in obtaining private sector evaluation and design services associated with a building permit for a principal place of residence or the repair of a system serving a principal place of residence.

BACKGROUND:

Historically, VDH staff served as the primary provider of site and soil evaluations and designs in the Commonwealth for onsite sewage systems and private wells. However, several pieces of legislation approved in the 1990's created a process for VDH to accept evaluations and designs from private sector service providers. Since that time, two overarching principles have emerged: VDH should continue providing regulatory oversight; and VDH should increase private sector participation to the extent possible. Over time, and without a specific statutory mandate to require private evaluations and designs, the use of private sector service providers gained broad acceptance in many parts of the Commonwealth, primarily in those areas with higher property values and higher rates of growth. However, areas of low private sector participation persist today, particularly in more rural areas of the Commonwealth.

In 2016, VDH released A Plan for the Orderly Reduction and Elimination of Evaluation and Design Services by the Virginia Department of Health for Onsite Sewage Systems and Private Wells ([HB 558 Report](#)). The HB 558 Report detailed VDH's strategic vision to shift evaluation and design services for onsite sewage systems and private wells to the private sector in an orderly manner, allowing limited VDH resources to re-focus on improving public health and the environment. The HB 558 Report presented 20 specific recommendations to implement the strategic vision, including means testing by VDH of owners over an initial transition period and establishing guidelines for VDH serving as a provider of last resort for owners able to demonstrate specific hardships in obtaining private sector services. VDH recognized several geographic areas within the Commonwealth, as well as several application types, would be particularly difficult to transition to the private sector. VDH recommended means testing and the development of guidelines to address situations where owners could demonstrate a hardship

in obtaining private sector services to ensure access to onsite sewage system and private well evaluation and design services for all Virginians.

Chapter 602 of the 2017 Virginia Acts of Assembly ([HB 2477](#)) directed VDH to begin eliminating site evaluation and design services for onsite sewage systems and private wells. VDH accomplished this directive by enacting recommendations from the HB 558 Report through agency policy. In 2018, the Virginia General Assembly enacted § 32.1-248.4 of the Code ([HB888](#)), directing VDH to implement the remaining recommendations from the HB 558 Report and complete the transition of evaluation and design services to the private sector. Section 32.1-248.4 of the Code provides a plan to transition onsite sewage system and private well evaluation and design services to the private sector over five years. However, the Code maintains the ability for VDH to provide evaluation and design services throughout the transition based on means testing of owners. Section 32.1-248.4 of the Code also continues the authorization for VDH to provide evaluation and design services throughout and after the five-year transition period for owners demonstrating a specific hardship acquiring private sector evaluation and design services associated with a building permit for a principal place of residence or the repair of a failing system serving a principal place of residence.

Section 32.1-248.4 of the Code sets out specific income eligibility criteria for means testing of owners from July 1, 2019, to June 30, 2023, using the federal poverty guidelines. The Code also directs VDH to develop guidelines for hardships, including (i) the availability of properly licensed service providers working within a locality or region, (ii) the disciplinary history of private sector providers, and (iii) the cost of private sector services. The hardship guidelines established by this policy set the criteria for owners to request onsite sewage system and private well evaluation and design services from VDH as directed by § 32.1-248.4 of the Code.

EXCLUSIONS FROM MEANS TESTING AND HARDSHIP GUIDELINES

Pursuant to § 32.1-248.4 of the Code, all owners must seek private sector services for the following beginning July 1, 2018: onsite sewage system voluntary upgrades, certification letters, subdivision evaluations, and applications for new onsite sewage systems not serving a principal place of residence. The means testing criteria and hardship guidelines outlined in this policy do not apply to these application types, as VDH no longer offers these specific evaluation and design services.

Evaluations and design types requiring private sector design services prior to July 1, 2018, by VDH policy are ineligible for VDH services. These services include evaluation or design for: non-residential onsite sewage systems; onsite sewage systems with a design flow over 1,000 gallons per day; alternative onsite sewage systems; alternative discharging sewage systems; and onsite sewage system designs requiring the services of a professional engineer.

MEANS TESTING:

Beginning July 1, 2019, and until June 30, 2020, owners that submit a complete application with a household income at or below 400 percent of the federal poverty guidelines established by the

[U.S. Department of Health and Human Services](#) (federal poverty guidelines) may receive VDH evaluation and design services for: a) new or repair conventional onsite sewage systems serving a principal place of residence; b) private wells; and c) safe, adequate, and proper evaluations for conventional onsite sewage systems serving a principal place of residence (as required by §32.1-165).¹ Owners seeking such services must first petition VDH to provide services using the Petition for VDH Services Form (Appendix A). Means testing of the owner's income shall follow the same procedure as the determination of income eligibility for fee waivers (see VDH's [Eligibility Guidance Document for the Regulations Governing Standards & Charges for Medical Care Services to Individuals](#) or successor policy).

Eligibility shall be reduced to owners over the course of the next four years as outlined below.

Dates	Household Income at or Below
July 1, 2020 to June 30, 2021	300%
July 1, 2021 to June 30, 2022	200%
July 1, 2022 to June 30, 2023	100%
On and after July 1, 2023	Means testing ends.

A detailed listing of the specific means testing criteria from July 1, 2019, to June 30, 2020 is included in Appendix B.

HARDSHIP GUIDELINES:

Owners who do not meet the means testing criteria outlined in § 32.1-248.4 of the Code may still be eligible to receive services from VDH. Owners meeting any of the following hardships shall be eligible to receive VDH evaluation and design services for: a) new or repair conventional onsite sewage systems serving a principal place of residence; b) private wells; and c) safe, adequate, and proper evaluations for conventional onsite sewage systems serving a principal place of residence (as required by [§ 32.1-165](#) of the Code). Owners seeking services based on the following hardship guidelines must petition VDH to provide services using the Petition for VDH Services Form.

A. Owners Eligible for Fee Waivers for Construction Permits, Repair Permits, and Pit Privies.

Any owner eligible to receive a fee waiver pursuant to section [12VAC5-620-80.A](#) of the [Regulations Governing Application Fees for Construction Permits for Onsite Sewage Disposal Systems and Private Wells](#) (12VAC5-620 et seq., the Fee Regulations) shall be eligible to receive VDH evaluation and design services.² Further, any owner with income below 200

¹ This includes projects that will be wholly or partially funded by public funds or funds from a non-profit organization, provided the evaluation and design services required are outside of the exclusions of this policy (e.g. evaluations and designs for conventional onsite sewage systems equal to or less than 1,000 GPD).

² Section 12VAC5-620-80.A establishes the fee waiver when an owner whose family income is at or below the 2013 Poverty Income Guidelines for the 48 Contiguous States and the District of Columbia established by the [Department](#)

percent of the federal poverty guidelines shall be eligible to receive VDH evaluation and design services when the application is for a pit privy or for a repair of a failing onsite sewage system.³ Determination of eligibility for a hardship based on income shall follow the same procedure as the determination of income eligibility for fee waivers (see VDH's Eligibility Guidance Document for the Regulations Governing Standards & Charges for Medical Care Services to Individuals or successor policy).

B. Replacement Wells and Well Abandonments.

Any owner eligible to receive a fee waiver for the replacement or abandonment of a private well pursuant to section [12VAC5-620-80.D](#) or [12VAC5-620-80.E](#) of the Fee Regulations shall be eligible to receive VDH evaluation and design services.⁴

C. Safe, Adequate, and Proper Evaluations.

Any owner seeking a safe, adequate, and proper evaluation for a conventional onsite sewage system serving a principal place of residence (as required by § 32.1-165 of the Code) shall be eligible to receive VDH evaluation services from July 1, 2019, to June 30, 2020. Over this period, VDH will use improved data collection regarding the number of safe, adequate, and proper evaluations to determine whether localities have a sufficient number of private sector service providers to transition these services to the private sector. The Hardship Guidelines will be updated based on this information, including an appropriate map and list of localities in Appendix D.

D. Number of Private Sector Providers.

Any owner seeking evaluation and design services in a locality with an insufficient number of private sector service providers shall be eligible to receive VDH evaluation and design services. A locality will be deemed to have an insufficient number of private sector service providers when the number of bare applications received in the locality from May 1st of the previous year to April 30th of the current calendar year that resulted in the issuance of a permit exceeds the estimated number of additional designs that the private sector could provide in that locality. Once a locality is determined to have a sufficient number of private sector services providers, it shall maintain that designation. VDH will estimate the number of additional designs the private sector could provide in a locality by using the following equation:

[of Health and Human Services, 78FR 5182](#) (January 24, 2013), or any successor guidelines, shall not be charged a fee.

³ This includes projects that will be wholly or partially funded by public funds or funds from a non-profit organization, provided the evaluation and design services required are outside of the exclusions of this policy (e.g. evaluations and designs for conventional onsite sewage systems equal to or less than 1,000 GPD).

⁴ Section 12VAC5-620-80.D allows the fee to be waived for any person applying for a construction permit for the replacement of a private well. Section 12VAC5-620-80.E allows the fee to be waived for any person applying for a permit to properly and permanently abandon or decommission an existing well on property that is their principal place of residence.

$$(P \times A) G - W = X$$

P = Number of private sector providers that submitted at least five evaluations and designs within the locality from May 1st of the previous year to April 30th of the current calendar year.⁵

A = Average number of evaluations and designs per private sector provider submitted within the region from May 1st of the previous year to April 30th of the current calendar year that resulted in a permit. Only private sector providers submitting at least 10 evaluations and designs within the region will be counted. (A map showing the specific regions is provided below; Map 1.)

G = Private sector growth factor. For July 1, 2019 to June 30, 2020, G will equal 1.25. For July 1, 2020 to June 30, 2021, G will equal 1.5. From July 1, 2021 to June 30, 2022, G will equal 1.75. From July 1, 2022 to June 30, 2023, G will equal 2.

W = Total number of private sector evaluations and designs submitted within the locality from May 1st of the previous year to April 30th of the current calendar year that resulted in a permit.

X = Estimated number of additional evaluations and designs that could be provided by the private sector.

Any locality receiving 10 or fewer total applications during the review period⁶ will be determined to have a sufficient number of private sector service providers. Any locality that receives more than 10 total applications during the review period, but has less than two private sector service providers submitting at least five evaluations and designs each during the review period will be designated as having an insufficient number of private sector service providers.

VDH will use the agency's statewide environmental health database to determine P, A, and W. For determining the average number of private sector designs, VDH will use Map 1 to set each region for review, and will include only private sector providers submitting at least 10 evaluations and designs within the region during the review period. The equation will be run separately for onsite sewage system evaluations and designs, private well evaluations and designs, and safe, adequate, and proper evaluations. Therefore, VDH may determine a locality has an insufficient number of private sector service providers for one service, but an adequate number of private sector service providers for others.

⁵ For onsite sewage system construction services, "private sector providers" will include Onsite Soil Evaluators (OSE) and Professional Engineers (PE). For private well construction services, "private sector providers" will include OSEs, PEs, and Water Well System Providers. For safe, adequate, and proper evaluations, "private sector providers" will include OSEs, PEs, Onsite Sewage System Installers, Onsite Sewage System Operators, and individuals certified by the National Sanitation Foundation (or equivalent).

⁶ "Review period" for the purpose of this policy means May 1st of the previous year to April 30th of the current calendar year for the review.

Map 1: Service Provider Regions

VDH will post a list of localities (independent cities and counties) with an insufficient number of private sector services providers on the agency website. The list will be updated annually using information from the agency's statewide environmental health database for the review period and will follow applicable requirements for posting and public comment. A copy of the list is included in Appendix D.

During review periods, private sector service providers undergoing a disciplinary action against their license from the Department of Professional and Occupational Regulations (DPOR) will not count toward the number of private sector providers submitting evaluations and designs within a locality until the disciplinary effective date runs. Likewise, VDH will not count service providers with revoked or suspended licenses during the period of license revocation or suspension, including those overlapping two or more review periods.

E. Further Considerations.

Owners failing to qualify for a specific hardship outlined in this policy may petition the District Health Director for further consideration, provided the requested evaluation and design service is not exempt from the hardship guidelines. The District Health Director may delegate review of such request to the District Environmental Health Manager. Such requests will be reviewed on a case-by-case basis, and the final determinations will be tracked by each local health district. Reviewers are encourage to consult with the Director of the Division of Onsite Sewage and Water Service, Environmental Engineering, and Marina Programs or the Division Director's designee prior to rendering a final decision, and shall inform the Division Director of all final decisions. The reviewer's evaluation shall consider the effect granting the request will have on: the agency's vision to transition evaluation and design services to the private sector; the operation of the proposed onsite sewage system or private well; and the effect on protection of

public health and the environment. Additionally, request for further consideration based on timeliness of service shall consider: the number and the types of service providers contacted by the owner prior to the request (e.g. operators and installers may be able to diagnose repairs to a failing system that can be completed as maintenance without the services of a designer). Please note, these are agency case decisions and the hardship qualification review process is subject to the Administrative Process Act.

F. Annual Review.

VDH will conduct a review of this policy annually until at least July 1, 2023, and make revisions as necessary. Annual reviews will continue until all applications received are supported by evaluations and designs from a private sector service provider. The review shall include the following:

1. Recommendations for revisions provided by the Sewage Handling and Disposal Advisory Committee and other stakeholders.
2. Analysis of requests for VDH services pursuant to income eligibility criteria in Part 1, §4 of § 32.1-248.4 of the Code to determine whether income eligibility criteria in part A of the Hardship Guidelines should be revised.
3. Analysis of the estimated number of additional evaluations and designs that could be provided by the private sector within localities versus the actual increases observed for the review period to determine whether modification to the equation in Section IV is necessary.
4. Analysis of hardship requests for further considerations and determinations rendered for each case by District Health Directors to determine whether additional specific hardships or exclusions are necessary.
5. Analysis of the percent of private sector safe, adequate, and proper evaluations.
6. Analysis of the percent of private sector evaluations and designs for alternative onsite sewage system and conventional onsite sewage systems to determine whether additional verification of owner disclosure is required.⁷
7. To assist owners in making informed decisions regarding onsite sewage system and private well evaluation and design services, VDH will conduct surveys regarding the cost of private sector services. Information regarding the average cost of private sector services will be posted on the agency website.
8. Updating the policy based on changes to the Federal Poverty Guidelines.

A copy of VDH's annual review shall be posted on the agency website.

⁷ Private sector service providers are required to disclose to the owner when a conventional onsite sewage system is an option.

⁸ (Insert link to VDH website – list of localities with insufficient number of private sector service providers.)

Appendix C
Hardship Guidelines Summary

Excluded from Hardship Evaluation	Qualify to Petition for Hardship
Onsite Sewage System Voluntary Upgrades	New Onsite Sewage System for a Principal Place of Residence– Owner Qualifies for Fee Waiver Under 12VAC5-620-80
Certification Letters	All SAPs
Subdivision Evaluations	Replacement Wells
New Onsite Sewage Systems Not For a Principal Place of Residence	Well Abandonments
Non-residential Onsite Sewage Systems	Conventional Onsite Sewage System Repairs – Owner income below 200% of Federal Poverty Guidelines
Onsite Sewage Systems Greater than 1,000 GPD	Pit Privy – Owner income below 200% of Federal Poverty Guidelines
Alternative Onsite Sewage Systems	VDH Determines Locality Has an Insufficient Number of Private Sector Service Providers (Includes Localities With Fewer Than 2 Private Sector Services Providers Submitting at Least 5 Evaluations and Designs Each During the Review Period).
Alternative Discharging Sewage Systems	
Systems Requiring a Professional Engineer	

Appendix D
Localities with an Insufficient Number of Service Providers – Onsite Sewage System
Construction

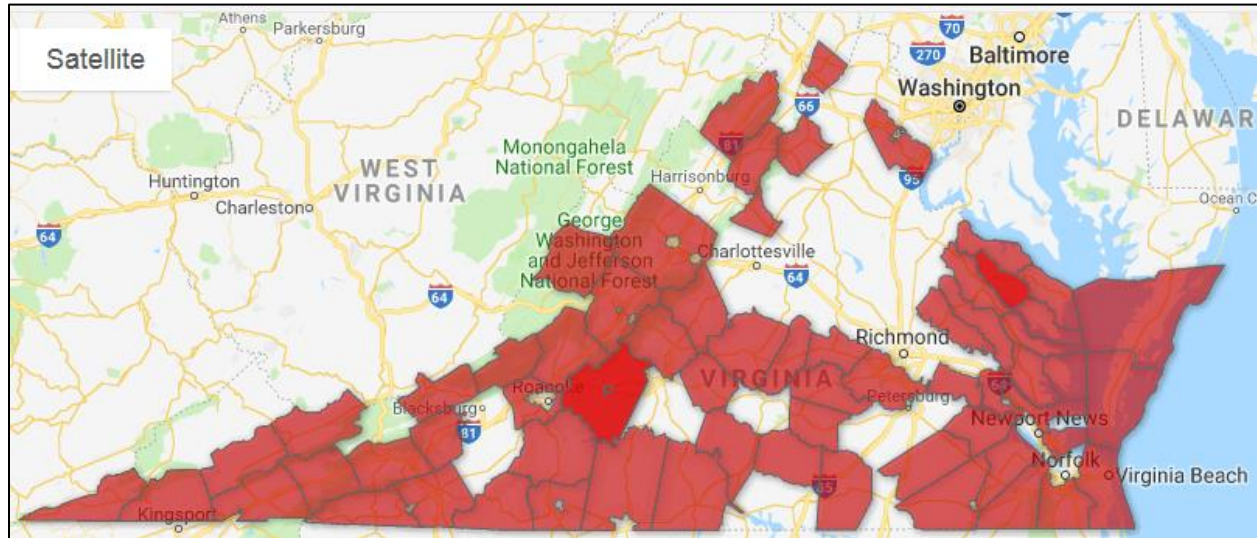

List of Localities Meeting Hardship

Accomack	Alleghany	Amelia	Appomattox

Localities with an Insufficient Number of Service Providers – Safe, Adequate, and Proper
Evaluations

All localities. Safe, adequate, and proper evaluations are listed as an eligible hardship.

Appendix E
Onsite Sewage and Private Well Application

Commonwealth of Virginia

Application for: Sewage System Water Supply

VDH Use only

Health Department ID# _____

Due Date _____

Owner _____

Mailing Address _____

Agent _____

Mailing Address _____

Site Address _____

Phone _____

Phone _____

Fax _____

Phone _____

Phone _____

Fax _____

Email _____

Directions to Property: _____

Subdivision _____ Section _____ Block _____ Lot _____

Tax Map _____ Other Property Identification _____ Dimension/Acreage of Property _____

Sewage System

Type of Approval: Applicants for new construction are advised to apply for a certification letter to determine if land is suitable for a sewage system and to apply for a construction permit (valid for 18 months) **only when ready to build.**

Certification Letter Construction Permit Voluntary Upgrade Repair Permit Minor Modification

Proposed Use:

Single Family Home (Number of Bedrooms _____) Multi-Family Dwelling (Total Number of Bedrooms _____)

Other (describe) _____

Basement? Yes No Walk-out Basement? Yes No Fixtures in Basement Yes No

Conditional permit desired? Yes No If yes, which conditions do you want?

Reduced water flow Limited Occupancy Intermittent or seasonal use Temporary use not to exceed 1 year

Do you wish to apply for a betterment loan eligibility letter? Yes No *There is a \$50 fee for determination of eligibility.

Water Supply

Will the water supply be Public or Private? Is the water supply Existing or Proposed?

If proposed, is this a replacement well? Yes No If yes, will the old well be abandoned? Yes No

Will any buildings within 50' of the proposed well be termite treated? Yes No

Well Type (e.g. domestic use, agricultural, irrigation, etc.) _____

All Applicants

Is this property indeed to serve as your (owners) principal place of residence? Yes No

All applications must be accompanied by private sector evaluations and designs, unless a petition for VDH services is approved. Is a Petition for Service form attached? Yes No

In order for VDH to process your application for a sewage system you must attached a plat of the property and a site sketch. For water supplies, a plat of the property is recommended and a site sketch is required. The site sketch should show your property lines, actual and/or proposed buildings and the desired location of your well and/or sewage system. When the site evaluation is conducted the property lines, building location and the proposed well and sewage sites must be clearly marked and the property sufficiently visible to see the topography. I give permission to the Virginia Department of Health to enter onto the property described during normal business hours for the purpose of processing this application and to perform quality assurance checks of evaluations and designs certified by a private sector Onsite Soil Evaluator or Professional Engineer as necessary until the sewage disposal system and/or private water supply has been constructed and approved.
