Redlined Document

Participants:

VDH Policy Staff:

Goal: Determine which definitions in the Open Heart Surgery, Transplant Surgery Committee, & Cardiac Catheterization in the Virginia Code need the following:

- Added
- Brought up-to-date
- Deleted

Recommended Revisions

1. **Wait Time** –
2. **Travel Time** -
3. **SHSP** –
4. **SMFP** -

Criteria and Standards for Open Heart Surgery

12VAC5-230-440. Travel time.

A. Open heart surgery services should be within 60 minutes driving time one way under normal conditions of 95% of the population of the health planning district using mapping software as determined by the commissioner.

B. Such services shall be available 24 hours a day, seven days a week.

12VAC5-230-450. Need for new service.

A. No new open heart services should be approved unless:

1. The service will be available in an inpatient hospital with an established cardiac catheterization service that has performed an average of 1,200 DEPs for the relevant reporting period and has been in operation for at least 30 months;
2. Open heart surgery services located in the health planning district performed an average of 400 open heart and closed heart surgical procedures for the relevant reporting period; and
3. The proposed new service will perform at least 150 procedures per room in the first year of operation and 250 procedures per room in the second year of operation without significantly reducing the utilization of existing open heart surgery services in the health planning district.

B. Preference may be given to a project that locates new open heart surgery services at an inpatient hospital more than 60 minutes driving time one way under normal condition from any site in which open heart surgery services are currently available and:

1. The proposed new service will perform an average of 150 open heart procedures in the first year of operation and 200 procedures in the second year of operation without significantly reducing the utilization of existing open heart surgery rooms within two hours driving time one way under normal conditions from the proposed new service location below 400 procedures per room; and
2. The hospital provided an average of 1,200 cardiac catheterization DEPs during the relevant reporting period in a service that has been in operation at least 30 months.

12VAC5-230-460. Expansion of service.

Proposals to expand open heart surgery services shall demonstrate that existing open heart surgery rooms operated by the applicant have performed an average of:

1. 400 adult equivalent open heart surgery procedures in the relevant reporting period if the proposed increase is within one hour driving time one way under normal conditions of an existing open heart surgery service; or
2. 300 adult equivalent open heart surgery procedures in the relevant reporting period if the proposed service is in excess of one hour driving time one way under normal conditions of an existing open heart surgery service in the health planning district.

12VAC5-230-470. Pediatric open heart surgery services.

No new pediatric open heart surgery service should be approved unless the proposed new service is provided at an inpatient hospital that:

1. Has pediatric cardiac catheterization services that have been in operation for 30 months and have performed an average of 200 pediatric cardiac catheterization procedures for the relevant reporting period; and
2. Has pediatric intensive care services and provides specialty or subspecialty neonatal special care.

12VAC5-230-480. Staffing.

A. Open heart surgery services should have a medical director who is board certified in cardiovascular or cardiothoracic surgery by the appropriate board of the American Board of Medical Specialists.

In the case of pediatric cardiac surgery, the medical director should be board certified in cardiovascular or cardiothoracic surgery, with special qualifications and experience in pediatric cardiac surgery and congenital heart disease, by the appropriate board of the American Board of Medical Specialists.

B. Cardiac surgery should be under the direct supervision of one or more qualified physicians.

Pediatric cardiac surgery services should be under the direct supervision of one or more qualified physicians.

Part IX. Organ Transplant

12VAC5-230-700. Travel time.

A. Organ transplantation services should be accessible within two hours driving time one way under normal conditions of 95% of Virginia's population using mapping software as determined by the commissioner.

B. Providers of organ transplantation services should facilitate access to pre and post transplantation services needed by patients residing in rural locations by establishing part-time satellite clinics.

12VAC5-230-710. Need for new service.

A. There should be no more than one program for each transplantable organ in a health planning region.

B. Performance of minimum transplantation volumes as cited in [12VAC5-230-720](#) does not indicate a need for additional transplantation capacity or programs.

Statutory Authority

12VAC5-230-720. Transplant volumes; survival rates; service proficiency; systems operations.

A. Proposals to establish organ transplantation services should demonstrate that the minimum number of transplants would be performed annually. The minimum number transplants of required by organ system is:

Kidney	30
Pancreas or kidney/pancreas	12
Heart	17
Heart/Lung	12
Lung	12
Liver	21
Intestine	2

Note: Any proposed pancreas transplant program must be a part of a kidney transplant program that has achieved a minimum volume standard of 30 cases per year for kidney transplants as well as the minimum transplant survival rates stated in subsection B of this section.

B. Applicants shall demonstrate that they will achieve and maintain at least the minimum transplant patient survival rates. Minimum one-year survival rates listed by organ system are:

Kidney	95%
Pancreas or kidney/pancreas	90%
Heart	85%
Heart/Lung	70%

Lung	77%
Liver	86%
Intestine	77%

12VAC5-230-730. Expansion of transplant services.

A. Proposals to expand organ transplantation services shall demonstrate at least two years successful experience with all existing organ transplantation systems at the hospital.

B. Preference may be given to a project expanding the number of organ systems being transplanted at a successful existing service rather than developing new programs that could reduce existing program volumes.

12VAC5-230-740. Staffing.

Organ transplant services should be under the direct supervision of one or more qualified physicians.

Statutory Authority

§ [32.1-102.2](#) of the Code of Virginia.

Article 1. Criteria and Standards for Cardiac Catheterization Services

12VAC5-230-380. Travel time.

Article 1

Criteria and Standards for Cardiac Catheterization Services

Cardiac catheterization services should be within 60 minutes driving time one way under normal conditions of 95% of the population of the health planning district using mapping software as determined by the commissioner.

Historical Notes

Derived from Virginia Register [Volume 25, Issue 9](#), eff. February 15, 2009.

12VAC5-230-390. Need for new service.

A. No new fixed site cardiac catheterization service should be approved for a health planning district unless:

1. Existing fixed site cardiac catheterization services located in the health planning district performed an average of 1,200 cardiac catheterization DEPs per existing and approved laboratory for the relevant reporting period;
2. The proposed new service will perform an average of 200 DEPs in the first year of operation and 500 DEPs in the second year of operation; and
3. The utilization of existing services in the health planning district will not be significantly reduced.

B. Proposals for mobile cardiac catheterization laboratories should be approved only if such laboratories will be provided at a site located on the campus of an inpatient hospital. Additionally, applicants for proposed mobile cardiac catheterization laboratories shall be able to project that they will perform an average of 200 DEPs in the first year of operation and 350 DEPs in the second year of operation without significantly reducing the utilization of existing laboratories in the health planning district below 1,200 procedures.

C. Preference may be given to a project that locates new cardiac catheterization services at an inpatient hospital that is 60 minutes or more driving time one way under normal conditions from existing services if the applicant can demonstrate that the proposed new laboratory will perform an average of 200 DEPs in the first year of operation and 400 DEPs in the second year of operation without significantly reducing the utilization of existing laboratories in the health planning district.

12VAC5-230-400. Expansion of services.

Proposals to increase cardiac catheterization services should be approved only when:

1. All existing cardiac catheterization laboratories operated by the applicant's facilities where the proposed expansion is to occur have performed an average of 1,200 DEPs per existing and approved laboratory for the relevant reporting period; and
2. The applicant can demonstrate that the expanded service will achieve an average of 200 DEPs per laboratory in the first 12 months of operation and 400 DEPs in the second 12 months of operation without significantly reducing the utilization of existing cardiac catheterization laboratories in the health planning district.

12VAC5-230-410. Pediatric cardiac catheterization.

No new or expanded pediatric cardiac catheterization services should be approved unless:

1. The proposed service will be provided at an inpatient hospital with open heart surgery services, pediatric tertiary care services or specialty or subspecialty level neonatal special care;
2. The applicant can demonstrate that the proposed laboratory will perform at least 100 pediatric cardiac catheterization procedures in the first year of operation and 200 pediatric cardiac catheterization procedures in the second year of operation; and
3. The utilization of existing pediatric cardiac catheterization laboratories in the health planning district will not be reduced below 100 procedures per year.

12VAC5-230-420. Nonemergent cardiac catheterization.

A. Simple therapeutic cardiac catheterization. Proposals to provide simple therapeutic cardiac catheterization are not required to offer open heart surgery service available on-site in the same hospital in which the proposed simple therapeutic service will be located. However, these programs shall adhere to the requirements described in subdivisions 1 through 9 of this subsection.

The programs shall:

1. Participate in the Virginia Heart Attack Coalition, the Virginia Cardiac Services Quality Initiative, and the Action Registry-Get with the Guidelines or National Cardiovascular Data Registry to monitor quality and outcomes;
2. Adhere to strict patient-selection criteria;
3. Perform annual institutional volumes of 300 cardiac catheterization procedures, of which at least 75 should be percutaneous coronary intervention (PCI) or as dictated by American College of Cardiology (ACC)/American Heart Association (AHA) Guidelines for Cardiac Catheterization and Cardiac Catheterization Laboratories effective 1991;

4. Use only AHA/ACC-qualified operators who meet the standards for training and competency;
5. Demonstrate appropriate planning for program development and complete both a primary PCI development program and an elective PCI development program that includes routine care process and case selection review;
6. Develop and maintain a quality and error management program;
7. Provide PCI 24 hours a day, seven days a week;
8. Develop and maintain necessary agreements with a tertiary facility that must agree to accept emergent and nonemergent transfers for additional medical care, cardiac surgery, or intervention; and
9. Develop and maintain agreements with an ambulance service capable of advanced life support and intra-aortic balloon pump transfer that guarantees a 30-minute or less response time.

B. Complex therapeutic cardiac catheterization. Proposals to provide complex therapeutic cardiac catheterization should be approved only when open heart surgery services are available on-site in the same hospital in which the proposed complex therapeutic service will be located. Additionally, these complex therapeutic cardiac catheterization programs will be required to participate in the Virginia Cardiac Services Quality Initiative and the Virginia Heart Attack Coalition.

Derived from Virginia Register [Volume 25, Issue 9](#), eff. February 15, 2009; amended, Virginia Register [Volume 37, Issue 14](#), eff. March 31, 2021.

12VAC5-230-430. Staffing.

A. Cardiac catheterization services should have a medical director who is board certified in cardiology and has clinical experience in performing physiologic and angiographic procedures.

In the case of pediatric cardiac catheterization services, the medical director should be board-certified in pediatric cardiology and have clinical experience in performing physiologic and angiographic procedures.

B. Cardiac catheterization services should be under the direct supervision or one or more qualified physicians. Such physicians should have clinical experience in performing physiologic and angiographic procedures.

Pediatric catheterization services should be under the direct supervision of one or more qualified physicians. Such physicians should have clinical experience in performing pediatric physiologic and angiographic procedures.

Meeting Minutes
SHSP TF – OHTC Committee
 November 21, 2025
 Time 9 a.m.
 In-person
 Board Room 4, Perimeter Center
 9960 Mayland Drive, Henrico, VA 23233

Task Force Members in Attendance (alphabetical by last name): Dr. Kathy Baker (chair), Amanda Dulin, Dr. Thomas Eppes, Paul Dreyer

Absent Committee Members: Mr. Michael Desjadon

Staff in Attendance (alphabetical by last name): –Mr. Geoff Garner, Senior Policy Analyst, VDH OLC; Ms. Casey Miller, Policy Specialist, VDH OLC

Dr. Baker called the meeting to order at 9:15 a.m.

Ms. Miller welcomed the committee and took roll.

Dr. Baker asked what the approach is to plan.

Mr. Garner advised that this is a planning meeting to identify the data needed for our next meeting.

Dr. Eppes stated some localities have good access across state lines.

Dr. Baker identified the need for adult volumes as well as pediatric volumes.

Cardiac Catheterization discussion

Dr. Baker asked if the pediatric data is separate.

Ms. Dulin recommended going back to revisit the definitions.

Dr. Baker asked if the right data is being collected.

Mr. Garner said we can get data from Virginia Health Information.

Ms. Dulin stated the catheterization is going to be the hardest aspect because it is the most detailed.

Dr. Eppes said that tech is changing so fast, it is hard to keep up. He asked if you could lose your Virginia Certificate of Public Need (COPN) if you do not do enough procedures.

Ms. Dulin suggested looking into who exceeds the standards.

Mr. Dreyer stated that there used to be mobile cardiac catheterization, but not anymore.

Amanda Dulin stated that the mobile element is important to consider as well as wait times.

Transplant discussion

Mr. Dreyer asked if you need to be certified for each organ.

Dr. Eppes stated transplant is based on match and availability.

Ms. Dulin inquired about travel times.

Dr. Eppes stated there are facilities within a two-hour drive time in Richmond, Northern Virginia, University of Virginia, Tidewater, while Roanoke is four hours from certain places in VA.

Open Heart discussion

Ms. Dulin asked if Annual Licensure Survey Data should be augmented.

Mr. Dreyer said that we should look at the definition.

Ms. Dulin stated that open heart surgery is dependent on the depth and language to adopt a different data set, suggesting looking into the patient, diagnostic related groups, age, and the zip code where the patient lives.

Mr. Dreyer suggested the need to reconsider the “procedure” definition.

Dr. Eppes asked what is coming up on the horizon and how we would incorporate what is going on.

Transplant Discussion

Ms. Dulin asked about establishing part-time satellite clinics.

Dr. Eppes inquired into what is being done, where, and the volume.

Ms. Dulin asked what is being collected in Annual Licensure Survey Data files and suggested pulling a file from Virginia Health Information that includes the zip code of where the patient lives and the reach.

Dr. Baker said we need to enforce the current standard.

Mr. Dreyer asked what United Network Organ Sharing is doing.

Ms. Dulin stated the scope of potential donors has expanded and that impacts survival rates.

Ms. Miller stated a follow-up email will be sent to the committee members to confirm the data needed.

A follow-up virtual meeting was agreed upon for December 12, 2025, 2-5 p.m.

Meeting adjourned at 10:44 a.m.

COPN Definitions

Operating Rooms	Rooms capable of being equipped and staffed for a broad range of procedures.
Exclusive Use Rooms	An operating room reserved exclusively for one type of procedure.
Procedure Rooms	Rooms capable of being equipped and staffed for a broad range of minor procedures (i.e. EDG, Colonoscopy, ERCP, EUS, TEEs, PEG tube placement) and minor surgeries.
Inpatient Surgical Procedures	Number of surgical procedures identified by a distinct ICD10, CPT or DRG code per inpatient visit during the reporting period.
Inpatient Visits	Number of medical treatment sessions for one inpatient in one surgery room, which may involve several procedures that involve cutting into the body. Inpatient surgery cases require the patient to lodge overnight at the hospital before being released from the doctor's care. These procedures can be identified by a distinct ICD10 or CPT code during the reporting period for the specified surgery.
Inpatient Hours Actual Time Cut to Suture	The actual elapsed hours for all inpatient procedures from cut to end of suture.
Inpatient Minutes Actual Time Cut to Suture	The actual elapsed minutes for all inpatient procedures from cut to end of suture.
Average Inpatient Hours Actual Time Cut to Suture Per Visit	The average hours for all inpatient procedures from cut to end of suture.
Inpatient Hours Actual Preparation and Clean Up	The actual elapsed hours for preparation and clean up for all inpatient procedures.
Inpatient Minutes Actual Preparation and Clean Up	The actual elapsed minutes for preparation and clean up for all inpatient procedures.
Average Inpatient Hours Actual Preparation and Clean Up Per Visit	The average hours for preparation and clean up for all inpatient procedures.
Outpatient Non-Surgical Procedures	Number of non-surgical procedures identified by a distinct CPT or HCPCS code per outpatient visit during the reporting period. Incidental non-surgical procedures performed in conjunction with a surgical procedure should not be reported as a non-surgical procedure.
Outpatient Surgical Procedures	Number of surgical procedures identified by a distinct CPT or HCPCS code per outpatient visit during the reporting period
Outpatient Visits	Number of medical treatment sessions for one outpatient in one room, which may involve several procedures that involve cutting into the body. Outpatient surgery cases do not involve an overnight stay at the hospital. The procedures are identified by a distinct ICD10 or CPT code during the reporting period for the specified surgery.

Outpatient Hours Actual Time Cut to Suture	The actual elapsed hours for all outpatient procedures from cut to end of suture.
Outpatient Minutes Actual Time Cut to Suture	The actual elapsed minutes for all outpatient procedures from cut to end of suture.
Average Outpatient Hours Actual Time Cut to Suture Per Visit	The average hours for all outpatient procedures from cut to end of suture.
Outpatient Hours Actual Preparation and Clean Up	The actual elapsed hours for preparation and clean up for all outpatient procedures.
Outpatient Minutes Actual Preparation and Clean Up	The actual elapsed minutes for preparation and clean up for all outpatient procedures.
Average Outpatient Hours Actual Preparation and Clean Up Per Visit	The average hours for preparation and clean up for all outpatient procedures.
Total Procedures	The sum of "Inpatient Non-Surgical Procedures," "Inpatient Surgical Procedures," "Outpatient Non-Surgical Procedures," and "Outpatient Surgical Procedures."
Total Visits	The sum of "Inpatient Visits" and "Outpatient Visits."
Heart Transplants	Data was extracted from calendar year Patient Level Data using ICD-10 Procedure Codes: 02YA0Z* (but not 0BY*) where * is a placeholder for a wildcard character.
Kidney Transplants	Data was extracted from calendar year Patient Level Data using ICD-10 Procedure Codes: 0TY* (but not 0FYG*) where * is a placeholder for a wildcard character.
Liver Transplants	Data was extracted from calendar year Patient Level Data using ICD-10 Procedure Codes: 0FY00Z* where * is a placeholder for a wildcard character.
Bone Marrow Transplants / Infusions	Data was extracted from calendar year Patient Level Data using ICD-10 Procedure Codes: 302??G* or 302??X* or 302??Y* where * is a placeholder for a wildcard character.
Lung Transplants	Data was extracted from calendar year Patient Level Data using ICD-10 Procedure Codes: 0BY* (but not 02YA0Z*) where * is a placeholder for a wildcard character.
Pancreas Transplants	Data was extracted from calendar year Patient Level Data using ICD-10 Procedure Codes: 0FYG* (but not 0TY*) where * is a placeholder for a wildcard character.
Pancreas / Kidney Transplants	Data was extracted from calendar year Patient Level Data using ICD-10 Procedure Codes: 0TY* and 0FYG* where * is a placeholder for a wildcard character.
Heart / Lung Transplants	Data was extracted from calendar year Patient Level Data using ICD-10 Procedure Codes: 02YA0Z* and 0BY* where * is a placeholder for a wildcard character.

COPN Surgical Data

Intestinal Transplants	Data was extracted from calendar year Patient Level Data using ICD-10 Procedure Codes: 0DY8* and 0DYE* where * is a placeholder for a wildcard character.
Total Transplants	Sum of all transplant fields.
