### **Cost Benefit Analysis**

Complete Tables 1a and 1b for all regulatory actions. You do not need to complete Table 1c if the regulatory action is required by state statute or federal statute or regulation and leaves no discretion in its implementation.

Table 1a should provide analysis for the regulatory approach you are taking. Table 1b should provide analysis for the approach of leaving the current regulations intact (i.e., no further change is implemented). Table 1c should provide analysis for at least one alternative approach. You should not limit yourself to one alternative, however, and can add additional charts as needed.

Report both direct and indirect costs and benefits that can be monetized in Boxes 1 and 2. Report direct and indirect costs and benefits that cannot be monetized in Box 4. See the ORM Regulatory Economic Analysis Manual for additional guidance.

Table 1a: Costs and Benefits of the Proposed Changes (Primary Option)

(1) Direct &
Indirect Costs &
Benefits
(Monetized)

This regulatory change extends the period for a temporary permit for barbers, master barbers, cosmetologists, nail technicians, wax technicians, estheticians, and master estheticians. Under the current regulations, an applicant for licensure may receive a temporary permit for 45 days that allows the applicant to practice while waiting to take and pass the license examination. This action extends the period of a temporary permit to 90 days. Temporary permits are issued at no additional charge to an applicant. Temporary permits cannot be renewed.

This action also eliminates the current requirement for applicants to schedule an examination date in order to qualify for a temporary permit. Currently, applicants must schedule to take the license examination in order to receive a temporary permit.

Direct Costs: There are no new monetizable direct costs associated with this regulatory change.

Indirect Costs: There are no new monetizable indirect costs as a result of the proposed change.

#### Direct Benefits:

- The median pay for barbers, hairstylists, and cosmetologists is \$33,400 per year.
  - On a monthly basis, median income for these professions is \$2,783 per month.
  - o A 45-day temporary permit would allow an individual to earn approximately \$4,175.
  - o A 90-day temporary permit would allow an individual to ear approximately \$8,349.
  - A temporary permit holder would be able to earn an additional \$4,174 during the term of the temporary permit.
  - On average, the Board issues approximately 250 temporary permits per year.
  - Additional income x number of temporary permits: \$1,043,500.

#### Indirect Benefits:

- As an industry practice, licensed professionals pay a salon a booth rental fee to practice in the salon.
- The average booth rental fee is \$400 per month.
- During the term of a 45-day permit, a salon would receive approximately \$600 in booth rental income.

	<ul> <li>During the term of a 90-day permit, a salon would receive approximately \$1,200 in booth rental income, and would receive \$600 in additional income.</li> <li>Additional booth rental income x number of temporary permits: \$150,000.</li> </ul>

(4) Other Costs & Benefits (Non- Monetized)	Costs: There are no new non-monetizable direct or indirect costs associated with this regulatory change.  Benefits:			
	The proposed change will reduce the amount of time applicants must wait in order to receive a temporary permit because applicants will no longer be required to schedule an examination date before receiving the temporary permit.
