Fast-Track Regulation Agency Background Document

Agency name	Board of Nursing; Department of Health Professions
Virginia Administrative Code (VAC) citation(s)	18VAC90-19
Regulation title(s)	Regulations Governing the Practice of Nursing
Action title	Consistency of certification requirements with the Code
Date this document prepared	5-15-18

This information is required for executive branch review and the Virginia Registrar of Regulations, pursuant to the Virginia Administrative Process Act (APA), Executive Orders 17 (2014) and 58 (1999), and the *Virginia Register Form, Style, and Procedure Manual*.

Brief summary

Please provide a brief summary (preferably no more than 2 or 3 paragraphs) of the proposed new regulation, proposed amendments to the existing regulation, or the regulation proposed to be repealed. Alert the reader to all substantive matters or changes. If applicable, generally describe the existing regulation.

The Board has amended sections 210 and 220 of Chapter 19 to make the language pertaining to national certification as a clinical nurse specialist consistent with § 54.1-3018.1 of the Code of Virginia.

Acronyms and Definitions

Please define all acronyms used in the Agency Background Document. Also, please define any technical terms that are used in the document that are not also defined in the "Definition" section of the regulations.

CNS = clinical nurse specialist

Statement of final agency action

Please provide a statement of the final action taken by the agency including: 1) the date the action was taken; 2) the name of the agency taking the action; and 3) the title of the regulation.

On May 15, 2018, the Board of Nursing amended 18VAC90-19, Regulations Governing the Practice of Nursing.

Legal basis

Please identify the state and/or federal legal authority to promulgate this proposed regulation, including: 1) the most relevant citations to the Code of Virginia or General Assembly chapter number(s), if applicable; and 2) promulgating entity, i.e., agency, board, or person. Your citation should include a specific provision authorizing the promulgating entity to regulate this specific subject or program, as well as a reference to the agency/board/person's overall regulatory authority.

Regulations are promulgated under the general authority of Chapter 24 of Title 54.1 of the Code of Virginia. Section 54.1-2400 (6), which provides the Board of Nursing the authority to promulgate regulations to administer the regulatory system:

§ 54.1-2400 -General powers and duties of health regulatory boards

The general powers and duties of health regulatory boards shall be:

- 1. To establish the qualifications for registration, certification, licensure or the issuance of a multistate licensure privilege in accordance with the applicable law which are necessary to ensure competence and integrity to engage in the regulated professions.*
- 2. To examine or cause to be examined applicants for certification or licensure. Unless otherwise required by law, examinations shall be administered in writing or shall be a demonstration of manual skills.*
- 3. To register, certify, license or issue a multistate licensure privilege to qualified applicants as practitioners of the particular profession or professions regulated by such board.*
- 4. To establish schedules for renewals of registration, certification, licensure, and the issuance of a multistate licensure privilege.*
- 5. To levy and collect fees for application processing, examination, registration, certification or licensure or the issuance of a multistate licensure privilege and renewal that are sufficient to cover all expenses for the administration and operation of the Department of Health Professions, the Board of Health Professions and the health regulatory boards.*

6. To promulgate regulations in accordance with the Administrative Process Act (§ 2.2-4000 et seq.) which are reasonable and necessary to administer effectively the regulatory system. Such regulations shall not conflict with the purposes and intent of this chapter or of Chapter 1 (§ [54.1-100](#) et seq.) and Chapter 25 (§ [54.1-2500](#) et seq.) of this title. ...

In addition, there is statutory authority for the Board to register and regulate clinical nurse specialists:

§ 54.1-3005. *Specific powers and duties of Board.*

In addition to the general powers and duties conferred in this title, the Board shall have the following specific powers and duties:

9. *To maintain a registry of clinical nurse specialists and to promulgate regulations governing clinical nurse specialists;*

§ 54.1-3018.1. *Registration of clinical nurse specialists.*

The Board may register an applicant as a clinical nurse specialist if the applicant:

1. *Holds a valid license to practice professional nursing pursuant to this article; and*
2. *Has successfully completed a graduate-level clinical nurse specialist program within a regionally accredited college or university that meets all educational qualifications and standards established by national certification guidelines and holds a national clinical nurse specialist certification that prepares the professional nurse to deliver advanced nursing services.*

Purpose

Please explain the need for the new or amended regulation. Describe the rationale or justification of the proposed regulatory action. Describe the specific reasons the regulation is essential to protect the health, safety or welfare of citizens. Discuss the goals of the proposal and the problems the proposal is intended to solve.

The purpose is to align the regulation with the statute. The statute requires national certification as a clinical nurse specialist, but the regulation specifies a specialty certification. Since the all CNS applicants would have national certification, public health and safety would be adequately protected by registering a CNS without a specialty certification.

Rationale for using fast-track process

Please explain the rationale for using the fast-track process in promulgating this regulation. Why do you expect this rulemaking to be noncontroversial?

The action is intended to make the regulation consistent with the law, so there is a clearer understanding of the Board's authority to register clinical nurse specialists. Since the amended regulation is less restrictive, it should not be controversial.

Substance

Please briefly identify and explain the new substantive provisions, the substantive changes to existing sections, or both. A more detailed discussion is provided in the "Detail of changes" section below.

The Board has amended sections 210 and 220 to delete references to a specialty certification for a CNS and only require national certification as a clinical nurse specialist. The result would that a CNS who passed the core examination without taking a specialty examination and having a specialty certification could be registered as a CNS and could renew such registration by maintaining national certification.

Issues

Please identify the issues associated with the proposed regulatory action, including: 1) the primary advantages and disadvantages to the public, such as individual private citizens or businesses, of implementing the new or amended provisions; 2) the primary advantages and disadvantages to the agency or the Commonwealth; and 3) other pertinent matters of interest to the regulated community, government officials, and the public. If there are no disadvantages to the public or the Commonwealth, please indicate.

- 1) The primary advantage of the amendment is clearer language to avoid confusion or possible conflict between law and regulation. There are no disadvantages.
- 2) There are no advantages or disadvantages to the Commonwealth.
- 3) The Director of the Department of Health Professions has reviewed the proposal and performed a competitive impact analysis. The Board is authorized under § 54.1-2400 to "*promulgate regulations in accordance with the Administrative Process Act (§2.2-4000 et seq.) which are reasonable and necessary to administer effectively the regulatory system.*" There is no restraint on competition as a result of promulgating this regulation. The language is clarifying the current requirements for consistency with the Code.

Requirements more restrictive than federal

Please identify and describe any requirement of the proposal which is more restrictive than applicable federal requirements. Include a rationale for the need for the more restrictive requirements. If there are no applicable federal requirements or no requirements that exceed applicable federal requirements, include a statement to that effect.

There are no applicable federal requirements.

Localities particularly affected

Please identify any locality particularly affected by the proposed regulation. Locality particularly affected means any locality which bears any identified disproportionate material impact which would not be experienced by other localities.

There are no localities particularly affected.

Regulatory flexibility analysis

Pursuant to § 2.2-4007.1B of the Code of Virginia, please describe the agency’s analysis of alternative regulatory methods, consistent with health, safety, environmental, and economic welfare, that will accomplish the objectives of applicable law while minimizing the adverse impact on small business. Alternative regulatory methods include, at a minimum: 1) the establishment of less stringent compliance or reporting requirements; 2) the establishment of less stringent schedules or deadlines for compliance or reporting requirements; 3) the consolidation or simplification of compliance or reporting requirements; 4) the establishment of performance standards for small businesses to replace design or operational standards required in the proposed regulation; and 5) the exemption of small businesses from all or any part of the requirements contained in the proposed regulation.

In order to address the disconnect between the law and regulation, the Board discussed whether to seek an amendment to the Code section by passage of legislation by the General Assembly or to amend its regulation. It is likely that only a handful of applicants would seek registration based on the core examination and national certification (as specified in the law) since that examination has now been discontinued and only specialty examinations are offered. Therefore, the Board decided an amendment to regulation was reasonable and had the possibility of allowing a few applicants to be registered who might have otherwise been deemed ineligible.

Economic impact

Please identify the anticipated economic impact of the proposed new regulations or amendments to the existing regulation. When describing a particular economic impact, please specify which new requirement or change in requirement creates the anticipated economic impact.

<p>Projected cost to the state to implement and enforce the proposed regulation, including: a) fund source / fund detail; and b) a delineation of one-time versus on-going expenditures</p>	<p>As a special fund agency, the Board must generate sufficient revenue to cover its expenditures from non-general funds, specifically the renewal and application fees it charges to practitioners or entities for necessary functions of regulation. All notifications will be done electronically. There are no on-going expenditures.</p>
<p>Projected cost of the new regulations or changes to existing regulations on localities.</p>	<p>There are no costs of the new regulation to localities.</p>
<p>Description of the individuals, businesses, or other entities likely to be affected by the new</p>	<p>Applicants for CNS registration who have passed the core examination for national certification but</p>

regulations or changes to existing regulations.	do not have a specialty certification.
Agency’s best estimate of the number of such entities that will be affected. Please include an estimate of the number of small businesses affected. Small business means a business entity, including its affiliates, that: a) is independently owned and operated and; b) employs fewer than 500 full-time employees or has gross annual sales of less than \$6 million.	The Board does not have an estimate of the number but it will likely be fewer than ten persons who only passed the core examination before it was discontinued several years ago.
All projected costs of the new regulations or changes to existing regulations for affected individuals, businesses, or other entities. Please be specific and include all costs including: a) the projected reporting, recordkeeping, and other administrative costs required for compliance by small businesses; and b) specify any costs related to the development of real estate for commercial or residential purposes that are a consequence of the proposed regulatory changes or new regulations.	There are no additional costs.
Beneficial impact the regulation is designed to produce.	It could qualify a few CNS applicants who would otherwise not be registered to practice in the role of a clinical nurse specialist.

Alternatives

Please describe any viable alternatives to the proposal considered and the rationale used by the agency to select the least burdensome or intrusive alternative that meets the essential purpose of the action. Also, include discussion of less intrusive or less costly alternatives for small businesses, as defined in § 2.2-4007.1 of the Code of Virginia, of achieving the purpose of the regulation.

There are no alternatives to amended regulations. The amendments are intended to align the current regulations with the Code of Virginia.

Public participation notice

If an objection to the use of the fast-track process is received within the 30-day public comment period from 10 or more persons, any member of the applicable standing committee of either house of the General Assembly or of the Joint Commission on Administrative Rules, the agency shall: 1) file notice of the objections with the Registrar of Regulations for publication in the Virginia Register; and 2) proceed with the normal promulgation process with the initial publication of the fast-track regulation serving as the Notice of Intended Regulatory Action.

Family impact

Please assess the impact of this regulatory action on the institution of the family and family stability including to what extent the regulatory action will: 1) strengthen or erode the authority and rights of

parents in the education, nurturing, and supervision of their children; 2) encourage or discourage economic self-sufficiency, self-pride, and the assumption of responsibility for oneself, one’s spouse, and one’s children and/or elderly parents; 3) strengthen or erode the marital commitment; and 4) increase or decrease disposable family income.

There is no impact on the family or family stability.

Detail of changes

Please list all changes that are being proposed and the consequences of the proposed changes; explain the new requirements and what they mean rather than merely quoting the proposed text of the regulation. If the proposed regulation is a new chapter, describe the intent of the language and the expected impact. Please describe the difference between existing regulation(s) and/or agency practice(s) and what is being proposed in this regulatory action.

Current section number	Current requirement	Proposed change, intent, rationale, and likely impact of proposed requirements
210	Sets out requirements for registration as a clinical nurse specialist	Currently, regulations require a “specialty” certification for registration; the Code requires “national clinical nurse specialist certification.” The regulation is amended to be consistent with the statutory language in § 54.1-3018.1 Subsection B, which states requirements for renewal or reinstatement is also amended to use consistent language.
220	Sets out requirements for the practice of clinical nurse specialists	Currently, subsection B states that practice must be consistent with the standards of practice for the “designated specialty.” The reference to a specialty is deleted and replaced with a general reference to the standards established by a national certifying organization for clinical nurse specialists.
